

Project Summary – HCS Improvement Project

Problem Statement

The overall Retail Contact Center Sales and Support Agent HCS score did not achieve the FY26 target of 82, highlighting the need for focused, data-driven improvements. To meet the FY27 target of 86, we need to identify and implement targeted actions with speed.

Goal

Analyze Retail Contact Center Agent HCS data from T3 FY26 to identify key improvement opportunities and implement targeted actions by the end of September. Progress and impact will be monitored throughout October to ensure improvements are sustained.

Scope

The focus is on agent controllable opportunities. Out of scope are opportunities outside of the Retail Contact Center control.

Governance & Deliverables

Initial Deliverable

- Present HCS data analysis, with recommended next steps to Steering. Team formed and/or individual actions will be tracked as decided after the initial analysis.

Ongoing Deliverables

- Provide weekly updates to Steering on action plans, progress, outcomes, and risks.
(9:30-10 on Wednesdays beginning week 40)
- Ensure accountability and execution of approved actions.

Key Focus Areas Identified by the Previous HCS Taskforce

1. Increase Quality Evaluations and Coaching
 - Driven by RAMs to improve coworker performance, consistency, and development.
2. Strengthen Product Range Education
 - Driven by the New Specialists team to increase product knowledge and confidence in customer interactions.

Data notes:

Initially Monchelle will work with Data Analyst on data

- Distribution of data – similar to third party vendor quartile (consider 0)
- Include HCS and Attribute data (Knowledge, Manner, Trust) in analysis
 - *Attribute score of 3 or less goes to a zero HCC*
 - *Attribute score of 4 or higher goes to 100 HCS*
- Potential comparison to number of calls (survey rate by agent)
- By Supervisor/Employee for areas needing most attention
- Scatter plot of agent survey volume and HCS scores to determine if higher survey counts are associated with higher HCS

Example Quartile Chart (≥ 86 should be highlighted since it is the new goal)

Quartile	HCS	WK 30	WK 31	WK 32	WK 33
Q1	$\geq 83\%$	67	51	49	66
Q2	75%-83%	21	28	25	25
Q3	75%-60%	8	12	16	9
Q4	$< 60\%$	1	0	2	3
